

Power Distribution Unit

Physical Features	Dimensions	500mm(W) x 1,000mm(H) x 250mm(D)
	Weight	78 kg
	Main Components	Air switch, Contractor, Fuse, Terminal, Switch button, Overload relay, Lightning-proof device, auto power on/off circuit
	Installation Method	Hanging on wall or place on platform
	Ingress Protection	IP65
Electrical Capability	Input Voltage	3-phase electricity: AC220V OR AC 380V
	Output Power Consumption	Input: AC220V Output: AC220V+/-5% ≤5KW Input: AC380V Output: AC220V+/-5% >5KW
	Rating Electric Current	63A, 3-Phase
	Max Output Current	20A/ socket, 300A totally
	Electric Certificate	CE or UL
Operating Environment	Temperature Range	-35°C to +80°C
	Humidity	10-90% RH
Functions		Lightning Prevention (for outdoor use)
		Overload Protection
		Voltage and Current Hint

		Timing and Manually power on/off circuit
		Auto Intelligent power on/off (optional)
		2 or 3 connected power switch cabinets can be turned on with 2 secs delay
